

NGUYEN VAN AN

SYSTEM ANALYST

nguyen.van.an@gmail.com

0901234561

PROFESSIONAL SUMMARY

Detail-oriented System Analyst with 6+ years of experience in evaluating business requirements, designing efficient system solutions, and coordinating with technical teams to implement technology improvements. Proven track record of bridging the gap between users and developers, optimizing workflows, and supporting systems integration and upgrades. Adept at conducting requirement gathering, documentation, process mapping, and testing in both agile and traditional project environments.

PROFESSIONAL EXPERIENCE

System Analyst

Rimberio | Jakarta Indonesia

January 2020 – Present

- Collaborated with stakeholders across departments to define system requirements and translate business needs into clear technical specifications.
- Designed and improved internal systems that led to a 35% reduction in manual processes and improved data accuracy.
- Facilitated user acceptance testing (UAT) and created training materials for successful user adoption.
- Coordinated with developers and QA teams during implementation and issue resolution phases.

System Analyst

Borcelle | Jakarta Indonesia

February 2017 - December 2019

- Conducted in-depth business analysis to support system enhancement initiatives, resulting in more aligned technology solutions.
 - Created workflow diagrams, user stories, and process documentation for both IT and non-technical audiences.
 - Supported software testing phases by developing test scenarios and validating outputs.
 - Acted as liaison between business units and technical teams, ensuring clarity and alignment in system functionality.
